

WE'RE BRINGING ENGINEERING TO LIFE - SO WE CAN ENGINEER BETTER LIVES FOR NEW ZEALANDERS.

OUR AMBITIONS

We strive for Engineering New Zealand and our members to be:

CREDIBLE.

New Zealanders have trust and confidence in engineers and the work they do.

CONNECTED.

Engineers join together to share knowledge, skills and support, both here and abroad.

INFLUENTIAL.

Engineers' voice informs and shapes the public agenda.

RECOGNISED.

Engineers are celebrated for the fundamental contribution they make to society.

THRIVING.

Our members belong to a supportive community that makes them feel valued.

OUR GOALS :: 2020-2025

Our priorities for the next five years:

1 Every member has a clear pathway.

We support every member to advance along our membership pathway, in a way that makes them feel valued.

2 Chartership is the quality mark for all engineers.

We establish a single quality mark that's relevant for all engineering professionals and widely recognised.

3 Raising the bar across the profession.

We support high-quality engineering so that the government and public have trust and confidence in engineers and the work they do.

4 Our digital systems are integrated, intuitive and enabling.

We use technology to support our goals and deliver outstanding customer service.
